Product Compliance Pack

Product: Contact Centre
Country: United Kingdom

Reference pack (REF-UK-CC-001). Use this document as the standard format to prepare compliance packs for every other Worktual product and country.

Document ID	REF-UK-CC-001
Product	AI Contact Centre / Contact Centre Operations
Country / Region	United Kingdom (GB)
Related regimes	UK GDPR, DPA 2018, PECR (as amended), ICO guidance
Audience	BA, Legal/Compliance, Product, Compliance Engineering
Version	1.0 | 2026-09-01
Status	REFERENCE TEMPLATE - Legal review required before activation
Replication rule	One pack per Product x Country (plus Enterprise overlay if needed)

How teams should use this pack

1) Keep this structure unchanged. 2) Replace country/product content. 3) Attach primary sources. 4) Get Legal approval. 5) Engineering publishes approved obligations into the Compliance Knowledge Layer for runtime agent use.

1. Purpose

This pack defines the compliance obligations that Worktual Contact Centre agents and tools must follow for United Kingdom operations. It is the source input for the Compliance Knowledge Layer so rules are not hardcoded in prompts.

- Country + Product scoped (not a global dump of all laws)
- Structured obligations mapped to Contact Centre agents and actions
- Verification ideas for tool-based enforcement
- Reusable template for CRM, Ticketing, Campaigns, Web Tracking, and other countries

2. Replication standard for all products and countries

Every future pack must use the same skeleton:

Section	Required content
Cover metadata	Product, country, regimes, version, owner, status
Sources	Primary regulator/law/enterprise sources with URL and access date
Scope	Channels, data, agents, actions in/out of scope
Applicability	When the pack applies (subject location, processing location, etc.)
Obligation inventory	One row per rule with ID, severity, mapping, verification
Agent mapping	Which Worktual agents load which obligations
Runtime scenarios	2-3 example flows for BA/Legal validation
Open questions	Items only Legal can decide
Attachments	Original PDFs/exports

Suggested ID pattern: REF-<COUNTRY>-<PRODUCT>-<NNN> Examples: REF-IN-CC-001 (India Contact Centre), REF-UK-CRM-001 (UK CRM), REF-IN-CAMP-001 (India Campaigns).

3. Authoritative sources (UK Contact Centre)

Source	Publisher	Use for	Reference
Telephone marketing (PECR)	ICO	Live/automated marketing calls, TPS/CTPS, CLI	ico.org.uk .../telephone-marketing/
Live marketing calls guidance	ICO	Screening, objections, claims/pensions special cases	ico.org.uk .../guidance-on-direct-marketing-using-live-calls/

Source	Publisher	Use for	Reference
Choosing lawful basis for direct marketing	ICO	When PECR forces consent vs legitimate interests	ico.org.uk .../sending-direct-marketing-choosing-your-lawful-basis/
Legitimate interests guidance	ICO	LIA; helpline recording for training example	ico.org.uk .../legitimate-interests/
Enterprise Contact Centre Policy	Enterprise	Retention, disclosure script, auth, handoff SOPs	Attach internal policy PDF

BA note

ICO has marked some PECR guidance as under review due to Data (Use and Access) Act changes. Always record access date and ask Legal to confirm current interpretation before activation.

4. Product scope - Contact Centre

4.1 In scope

Channels	Inbound voice, outbound live/automated voice, webchat, email support, agent assist
Data	Identity, phone/email, recordings, transcripts, notes, dispositions, queue metrics
Agents	Contact Centre Super Agent, AI Support, Agent Assist, Interaction Closure, Outbound/Audience
Actions	Answer, record, authenticate, handoff, suppress, dial, disposition, store evidence

4.2 Out of scope (separate packs)

- Regulated financial advice scripts (FCA) - separate industry overlay
- Healthcare special-category deep controls - separate industry overlay
- India DPDP/TRAI Contact Centre pack - separate country pack
- EU GDPR Contact Centre pack - separate country/region pack

4.3 Applicability triggers

Load this UK Contact Centre pack when any approved trigger is true:

- Data subject / customer is in the UK
- Campaign targets UK telephone numbers
- Contact centre operations are UK-established / UK-processing
- Recording/transcript processing is governed by UK data protection law

Do not apply this pack only because the user interface language is English.

5. Obligation inventory

Severity: Blocking = stop action; Approval = human gate; Guidance = instruct agent; Evidence = retain proof.

5.1 Call recording and transparency

ID	Rule	When	Severity	Verify
UK-CC-REC-01	Tell caller recording may occur and why, early enough to understand	Recording/monitoring on	Blocking	Disclosure played/logged before record start
UK-CC-REC-02	Document lawful basis for recording (often LI after LIA; or consent/legal obligation)	Recording enabled	Blocking	Lawful-basis + LIA/consent reference present
UK-CC-REC-03	Do not reuse recordings/transcripts for new purposes (e.g. marketing) without fresh basis	Secondary use	Blocking	Purpose check on reuse tools
UK-CC-REC-04	Apply approved retention/deletion to recordings and transcripts	Stored media	Blocking	Retention policy ID attached

5.2 Outbound telephone marketing (PECR)

ID	Rule	When	Severity	Verify
UK-CC-TEL-01	Do not live-call TPS/CTPS numbers unless specific consent for your calls	Live marketing call	Blocking	TPS/CTPS screen PASS or consent evidence
UK-CC-TEL-02	Screen against organisation do-not-call / prior objections	Any marketing call	Blocking	DNC/objection registry check
UK-CC-TEL-03	Display calling line identity (do not withhold number)	Marketing call	Blocking	CLI presentation enabled
UK-CC-TEL-04	Identify organisation; provide address/Freephone if asked	Live marketing call	Mixed	Script/disclosure component present
UK-CC-TEL-05	No automated marketing calls without specific automated-call consent	Automated outbound	Blocking	Consent scope includes automated_calls
UK-CC-TEL-06	General or live-call consent is not enough for automated calls	Automated outbound	Blocking	Consent type validation
UK-CC-TEL-07	Claims-management marketing calls require specific consent	Claims marketing	Blocking	Sector flag + consent
UK-CC-TEL-08	Pension marketing calls only if PECR authorisation/relationship criteria met	Pension marketing	Approval+Block	Specialist eligibility + approval

5.3 Lawful basis and marketing rights

ID	Rule	When	Severity	Verify
UK-CC-LB-01	If PECR requires consent for the method, require consent evidence before send/call	PECR-consent methods	Blocking	Consent evidence token
UK-CC-LB-02	If live call allowed without consent, still document UK GDPR basis (consent or LI+LIA)	Live marketing call	Approval	Lawful-basis field required
UK-CC-LB-03	Stop marketing immediately on objection and suppress future marketing	Objection received	Blocking	Objection write + suppress

5.4 Inbound service / AI Contact Centre operations

ID	Rule	When	Severity	Verify
UK-CC-SVC-01	Use customer data only for the stated service purpose	Support interaction	Blocking	Purpose tag on tools
UK-CC-SVC-02	Authenticate before disclosing account-sensitive information	Sensitive enquiry	Blocking	Auth step completed
UK-CC-SVC-03	On explicit live-agent request, hand off and stop bot deflection loops	Human requested	Blocking	Handoff tool called
UK-CC-SVC-04	Mask/minimise sensitive data in assist suggestions per enterprise policy	Agent assist/transcripts	Mixed	Sensitive-data scanner
UK-CC-SVC-05	Confirm disposition accurately before final write when AI suggests outcome	Interaction closure	Approval	Human confirm on disposition

5.5 Evidence and audit

ID	Rule	When	Severity	Verify
UK-CC-AUD-01	Retain screening, consent, objection, disclosure, and approval evidence	High-risk actions	Blocking	Evidence IDs in decision log
UK-CC-AUD-02	Store policy-pack version used at decision time	Any compliance decision	Blocking	decision.policySetVersion present

6. Mapping to Worktual Contact Centre agents

Agent / capability	Must load	Typical tools
Contact Centre Super Agent	All applicable UK-CC-* for action	Policy resolve, decision token
AI Support Agent	REC-01, SVC-01..03	Disclosure, auth, purpose, handoff
Agent Assist / Coworker	SVC-02, SVC-04	Auth gate, sensitive mask
Interaction Closure	SVC-05, LB-03	Disposition confirm, suppress
Audience / Outbound Campaign	TEL-01..08, LB-01..03	TPS/CTPS, DNC, consent, CLI
Recording / QA workflows	REC-01..04, AUD-*	Disclosure, LIA, retention

7. Runtime decision model

For every governed Contact Centre action:

- 1. Resolve applicable packs (country + product + enterprise overlay)
- 2. Return only task-relevant obligations to the agent
- 3. Agent prepares action using guidance
- 4. Verification tools evaluate Blocking/Approval checks
- 5. Outcome: Allow / Approve / Block
- 6. Write audit evidence with policy version

7.1 Example A - UK outbound live marketing call

Campaign requests UK Contact Centre marketing rules -> Audience screens TPS/CTPS + DNC -> lawful basis/consent validated -> CLI on -> identity disclosure in script -> if customer objects, suppress and block future marketing -> audit log stored.

7.2 Example B - UK inbound recorded support call

Recording enabled -> disclosure played and logged -> lawful basis/LIA present -> AI Support answers with purpose limitation -> sensitive disclosure requires auth -> live-agent request triggers handoff -> retention policy applied to recording/transcript.

8. Standard verification outcomes

Failed check	System outcome
TPS/CTPS hit without specific consent	Block outbound marketing call
Automated call without automated-call consent	Block
Recording on without disclosure	Block recording start or require approval
Marketing objection present	Block and suppress
Sensitive disclosure without authentication	Block

Failed check	System outcome
Claims/pension special case incomplete	Approval required
Missing evidence for high-risk action	Block

9. Open questions for Legal/Compliance

- For this tenant, is QA recording based on legitimate interests, consent, or another basis?
- Exact IVR/agent disclosure wording and timing?
- Retention periods for recordings, transcripts, and AI summaries?
- Are claims-management or pension campaigns in scope?
- Quiet hours / frequency caps beyond PECR (enterprise policy)?
- How should webchat inherit equivalent transparency expectations?
- Current ICO PECR guidance status after DUAA amendments?

10. Attachment checklist

- [ ] ICO Telephone marketing export (dated)
- [ ] ICO live marketing calls guidance export (dated)
- [ ] ICO lawful basis for direct marketing export (dated)
- [ ] ICO legitimate interests export (dated)
- [ ] Enterprise Contact Centre Privacy Notice
- [ ] Enterprise Call Recording / Monitoring Policy
- [ ] Outbound dialler TPS/CTPS SOP
- [ ] Sample IVR disclosure script
- [ ] Do-not-call process SOP

11. Handoff to Compliance Knowledge Layer

After Legal approval, Compliance Engineering converts each obligation into:

- Structured policy metadata (country=GB, product=contact_centre)
- Machine-evaluable controls
- Agent and tool mappings
- Verification checks
- Citations to this pack and official sources
- Versioned publication with auditability

Activation rule

Until Legal marks this pack Approved, Worktual agents must not treat these obligations as live policy.

12. Next packs to create using this template

Priority	Pack ID	Focus
P0	REF-IN-CC-001	India Contact Centre (DPDP + TRAI commercial communication)
P0	REF-ENT-CC-001	Enterprise overlay for Contact Centre (scripts, retention, DNC)
P1	REF-UK-CAMP-001	UK Campaign Management (email/SMS/PECR)
P1	REF-UK-CRM-001	UK CRM (profiling, enrichment, proposals)
P1	REF-UK-TICK-001	UK Ticketing (access, retention, sensitive data)
P2	REF-UK-WEB-001	UK Web Tracking (cookies/PECR, purpose limitation)
P2	REF-EU-CC-001	EU Contact Centre (EU GDPR + ePrivacy)

Document control: REF-UK-CC-001 v1.0 | Worktual Product Compliance Pack | Prepared as the standard reference for BA teams | Not legal advice.
