Proposal Submitted to Nvidia

for

(AI Native Ticketing System)

Aug 3, 2026

Introduction

Worktual Innovations Pvt Ltd is pleased to submit this proposal to nvidia for the deployment of our AI Native Ticketing System. The solution combines conversational AI, role-based access, and omnichannel integration to automate ticket creation, intelligent routing, and resolution while delivering a seamless experience for both customers and support agents.

We have aligned the offering with nvidia's need for a scalable, AI-driven support platform that can handle high-volume technical inquiries across multiple channels and provide detailed analytics for continuous improvement.

Key Product Features

- Conversational ticket creation and updates via chat, voice, email, SMS, WhatsApp, Facebook and Instagram
- Role-based access model (Admin, Ticketing Agent, Resolver, Customer) with granular permissions
- AI-driven ticket assignment and routing based on subject, priority, sentiment and historical resolver data
- Full ticket lifecycle automation: creation → assignment → resolution → verification → closure → reopen if needed
- Context-aware AI that captures conversation history, suggests root-cause, and logs resolution steps
- Omnichannel ticket ID that unifies all interactions under a single reference
- SLA configuration and compliance tracking per ticket
- Real-time analytics dashboard with ticket volume, resolution time, agent performance and AI confidence scores
- Self-service portal for customers to create, track, comment on, and reopen tickets
- Knowledge-base integration for AI-assisted suggestions during ticket handling
- Easy integration with existing ITSM tools via REST APIs
- Scalable per-user licensing model with included ticket packs and optional add-on packs

Scope of Work

The following capabilities are included in the scope of this engagement:

- Deployment of the AI Native Ticketing System for up to 100 user licenses (adjustable on request)
- Configuration of role-based access for Admin, Ticketing Agent, Resolver and Customer profiles
- Integration with nvidia's existing communication channels: email, voice (IVR), SMS, web chat, WhatsApp, Facebook and Instagram
- AI model training using nvidia's historical ticket data to ensure high-confidence routing
- Setup of SLA rules, priority matrices and escalation workflows
- Inclusion of 2,000 tickets per user per month (as per licensing) and definition of additional ticket pack options
- Admin console, agent workspace and customer portal branding to match nvidia's corporate style
- Basic reporting dashboards (ticket volume, SLA compliance, agent performance)
- Knowledge-base linkage for AI-assisted suggestions

Out-of-Scope

- Custom integrations beyond the listed channels (e.g., proprietary CRM, ERP)
- Additional language packs beyond English
- Advanced analytics beyond the standard dashboard (e.g., predictive churn modeling)
- On-premise deployment; the solution is delivered as a managed SaaS offering.

A detailed list of use cases and configuration parameters will be captured during the kickoff workshop and documented as part of the onboarding deliverables.

Plan of Action

S.No	Activity	Responsibility	Start Date	End Date
1	Kick-off Workshop	Worktual	10-Sep-26	10-Sep-26
2	Requirement Gathering & Channel Inventory	Worktual & nvidia	11-Sep-26	15-Sep-26
3	System Configuration (Roles, SLA, Branding)	Worktual	16-Sep-26	22-Sep-26
4	AI Model Training with Historical Data	Worktual	23-Sep-26	30-Sep-26
5	Integration of Email, Voice, SMS, WhatsApp, Facebook, Instagram	Worktual	01-Oct-26	07-Oct-26
6	User Acceptance Testing (UAT)	nvidia	08-Oct-26	12-Oct-26
7	UAT Feedback Review & Refinement	Worktual	13-Oct-26	15-Oct-26
8	Go-Live Preparation & Cut-over Checklist	Worktual & nvidia	16-Oct-26	18-Oct-26
9	Production Go-Live	Worktual & nvidia	19-Oct-26	19-Oct-26
10	Post-Go-Live Support & Knowledge Transfer	Worktual	20-Oct-26	27-Oct-26

All dates are indicative and will be confirmed during the kickoff workshop.

Commercials

Pricing

- Per-user license: ₹15,000 / user / month (includes 2,000 tickets per month per user)
- Additional ticket packs (optional):
- 2,000 tickets – ₹2,000 per pack
- 5,000 tickets – ₹4,500 per pack
- 10,000 tickets – ₹8,000 per pack
- One-time implementation & setup fee: ₹50,000 (covers configuration, AI model training and integration work)

Terms and Conditions

1. Pricing & Taxes

- All amounts are exclusive of GST and any other statutory taxes.
- Prices are valid for 15 days from the date of this proposal.

1. Scope of Work & Additional Charges

- The quoted fees apply to the scope described in Section 3. Any change in scope (e.g., extra language packs, custom integrations) will be priced separately.

1. Payment Milestones

- 50 % of the one-time setup fee payable on receipt of a signed Purchase Order.
- Remaining 50 % payable upon successful UAT sign-off.
- Monthly subscription fees are payable in advance on the first day of each billing month.

1. Ticket Pack Management

- Unused tickets do not roll over to the next month.
- Additional packs can be purchased at any time and are applied to the current billing cycle.

1. Annual Commitment Option

- A 12-month prepaid subscription receives a 20 % discount on the total subscription fee (₹144,000 per user per year).
- Ticket packs purchased annually are also eligible for the same discount.

1. Late Payment & Service Suspension

- Payments overdue by more than 15 days may result in temporary suspension of the service until dues are cleared.

1. Confidentiality & Data Protection

- Worktual will process all data in accordance with applicable data-privacy regulations and will not disclose nvidia's confidential information to third parties.

All commercial terms are subject to the standard Worktual Master Services Agreement.

Onboarding Process

S.No	Activity Description	Responsibility
1	Provisioning of AI Native Ticketing System tenant	Worktual
2	Collection of branding assets and channel credentials (email, voice gateway, WhatsApp Business API, Facebook/Instagram pages)	nvidia
3	Role definition and user account creation (Admin, Agent, Resolver, Customer)	Worktual
4	Upload of historical ticket data for AI model training	nvidia (data) / Worktual (ingest)
5	Configuration of SLA rules, priority matrix and escalation paths	Worktual
6	Integration of omnichannel connectors (email, SMS, voice, social)	Worktual

S.No	Activity Description	Responsibility
7	Setup of knowledge-base links and AI suggestion engine	Worktual
8	User Acceptance Testing (UAT) – agents and a sample group of customers	nvidia
9	Review of UAT feedback and system refinements	Worktual
10	Go-Live readiness checklist and sign-off	nvidia & Worktual

Onboarding activities commence after receipt of the initial 50 % setup payment and are expected to be completed within 6-8 weeks.

Implementation Plan

A detailed implementation roadmap, including configuration steps, integration milestones, testing phases, and the final Go-Live schedule, will be presented during the kickoff workshop. The plan aligns with the timeline in Section 4 and ensures a smooth transition from legacy processes to the AI Native Ticketing System.

Support

Worktual provides 24 × 7 technical support under a 2-4-7 model (2 hours initial response, 4 hours resolution for critical issues, 7 days for non-critical). A dedicated account manager will serve as the single point of contact for nvidia throughout the subscription term. Support covers incident triage, AI performance tuning, periodic health checks and assistance with ticket-pack management.

Conclusion

Worktual is committed to delivering a robust, AI-driven ticketing platform that will enable nvidia to streamline support operations, improve first-contact resolution, and gain actionable insights from every interaction. We look forward to partnering with you on this transformative initiative.
