Proposal Submitted to hexaware

for

(AI Native Contact Centre (CCaaS))

Aug 3, 2026

Introduction

Yaswanth, a technology and software company based in India with over 500 employees, is pleased to present this proposal to Hexaware. Hexaware is a leading IT services provider with a workforce of more than 2,000 professionals and a strong focus on modernising customer engagement, boosting agent productivity, and leveraging data-driven insights.

Our AI-for-Enterprise offering – an AI Contact Centre combined with an AI Chat Bot – is purpose-built for large technology organisations. It aligns directly with Hexaware's strategic priorities and delivers measurable improvements across the customer service lifecycle.

Key capabilities that address Hexaware's needs include:

- Shift Scheduling: The system analyses historic call-volume patterns and automatically optimises agent rosters, ensuring coverage during peak periods while reducing idle time.
- Conversational Interface: Agents and customers interact with the AI without switching applications. The AI can retrieve customer records, ticket history, invoices, and CRM data instantly, and execute actions such as ticket creation, appointment scheduling, or follow-up emails.
- Automated Reporting & Analytics: Real-time dashboards and on-demand visualisations (e.g., "show today's inbound volume across all channels") are generated instantly, giving managers transparent insight into SLA compliance, resolution times, and agent performance.
- Similar Ticket Detection & Knowledge-Base Integration: The AI continuously scans incoming tickets, links related issues, and surfaces relevant SOPs, policies, and product documents, accelerating resolution and reducing duplicate effort.
- Live Calendar Booking: The bot accesses live calendars, proposes open slots, and confirms appointments on the spot, eliminating the need for callers to navigate external sites.
- Seamless Human Handover: When a caller is frustrated or requests a specialist, the AI places the caller on hold, routes them to an available agent, and supplies a complete summary of the conversation for a smooth transition.

By deploying this suite, Hexaware can expect higher agent efficiency, faster customer resolution, lower average handling time, and an enhanced overall customer experience – all supported by real-time, data-driven decision making.

We look forward to partnering with Hexaware to realise these outcomes.

Key Product Features

- Conversational AI with natural language understanding
- Agentic AI capable of autonomous decision-making
- Real-time recommendations and next-best-action suggestions for agents
- Intent recognition across voice, chat, SMS, email and social channels
- Long-term memory and context retention for seamless multi-turn dialogs
- Enriched, domain-specific responses powered by Hexaware's knowledge bases
- Semantic search across tickets, orders, invoices and CRM records
- Multimodal interaction (text, voice, image)
- Automated reminders, follow-ups and proactive lead qualification
- Personalized product suggestions, upselling and cross-selling
- Conversation-to-transaction workflow
- Enterprise-grade integrations (CRM, ERP, ticketing, e-commerce platforms)
- Advanced analytics with real-time visualisations and conversational queries (e.g., "Show today's inbound volume across all channels")
- Interactive appointment booking directly from the chat interface
- Shift-scheduling analytics that learn historic volume patterns and suggest optimal rosters
- Ticket auto-detection, linking of related issues and knowledge-base suggestions
- Seamless handover to human agents with full conversation summary

AI Contact Centre Omnichannel Capabilities

- Voice calls
- SMS
- Email
- Web chatbot
- WhatsApp
- Facebook
- Instagram

AI & Automation

- Agent assist with next-best-action suggestions
- Virtual agent for self-service
- Auto attendant and IVR
- Sentiment analysis and emotion detection
- Pre-built industry templates
- Intelligent reasoning engine
- Context-aware recommendations

Holistic Management

- Unified agent workspace
- Interaction history across all channels
- Queue management and smart routing
- Bot training and continuous learning
- Omnichannel monitoring and performance metrics
- Automated reporting and KPI tracking

Scope of Work

The following capabilities are included in the scope of this engagement for Hexaware:

- AI Chat Bot “Lola” – omnichannel bot sessions for web, WhatsApp, Facebook, Instagram, SMS and voice
- Unified Agent Dashboard with real-time reporting and analytics
- Admin and Agent login portals with role-based access
- English language support (additional languages can be added as a separate scope)
- Configuration of the AI Contact Centre tenant
- Bot build, training and continuous learning based on Hexaware’s knowledge assets
- Integration with Hexaware’s existing CRM and ticketing systems (REST API based)
- Integration with Shopify for e-commerce use-cases and optional logistics partners (Shipway, DHL, FedEx)
- Domestic telephony line (included) and international line (charged per usage)
- Shift-scheduling analytics module and automated reporting templates

Out-of-Scope
Any items not listed above – such as extra language packs, custom third-party integrations beyond the ones mentioned, payment processing through the bot, or on-premise hosting – will be scoped and priced separately.

A detailed list of use cases, data mapping, and onboarding checklist will be shared after the kick-off call as part of the implementation plan.

Plan of Action

S.No	Activity	Responsibility	Start Date	End Date
1	Kick-off Call	yaswanth	13-Oct-26	13-Oct-26
2	Account Set-up – List of Requirements	yaswanth	14-Oct-26	15-Oct-26
3	Account Set-up – List of Inputs (WhatsApp, Social Media, etc.)	hexaware	14-Oct-26	17-Oct-26
4	Share Inputs for Shopify / Logistics Integration API details	hexaware	14-Oct-26	17-Oct-26
5	Creation of CCaaS & Lola Account	yaswanth	15-Oct-26	17-Oct-26
6	Creation of Knowledge Base	yaswanth	22-Oct-26	28-Oct-26
7	Integration of Shopify (Shipway, DHL, FedEx) on WhatsApp & Web Bot	yaswanth	22-Oct-26	31-Oct-26
8	Lola Build and Training	yaswanth	22-Oct-26	31-Oct-26
9	User Acceptance Testing (UAT)	hexaware	03-Nov-26	05-Nov-26
10	Share UAT Feedback	hexaware	05-Nov-26	07-Nov-26
11	UAT Refinement	hexaware & yaswanth	08-Nov-26	12-Nov-26
12	Go-Live	hexaware & yaswanth	14-Nov-26	14-Nov-26

Note: Dates are indicative and may be adjusted based on project dynamics.

Commercials

Pricing

- Monthly license fee: ₹4,800 per agent per month (voice and chat enabled per skillset)
- Sessions per month: 1,500 sessions across all channels (including live chat with agents)
- One-time set-up fee: ₹50,000

Additional bot conversations can be purchased in bundles of 100, 500 or 1,000 sessions. Sessions are allocated monthly and do not roll over.

Terms and Conditions

1. Pricing & Taxes

- All prices are exclusive of applicable taxes, which will be charged as per prevailing law.
- The quoted prices are valid for 7 days from the date of submission.

1. Scope of Work & Additional Charges

- Prices apply only to the agreed scope. Any change in scope (e.g., international calling, new integrations, payment via bot) will attract separate charges.

1. Setup & Payment Milestones

- 50% of the set-up fee payable upon issuance of Purchase Order (PO).
- Remaining 50% payable upon completion of UAT.

1. Monthly Subscription Fees

- Fees must be paid upfront. First month's fee is due before Go-Live.
- Subsequent fees are due on or before the 5th day of each billing month.

1. Annual Payment Option & Session Bundling

- Annual pre-payment receives a 20% discount on the total subscription fee.
- All sessions are bundled for the year; unused sessions do not roll over and are non-refundable.

1. Default & Service Suspension

- Late payment may result in suspension of services until dues are cleared.

Onboarding Process

S.No	Activity Description	Responsibility
1	Creation of AI Contact Centre account	yaswanth
2	Creation of Knowledge Base & website content scrape	hexaware (content) / yaswanth (scrape)
3	Conversation Flow Training – provide expected flow inputs	hexaware
4	Train the AI bot for the expected flow	yaswanth
5	Web chatbot widget configuration	yaswanth
6	Provision of business accounts for WhatsApp, Facebook, Instagram	hexaware
7	Configure bot on social media channels	yaswanth
8	UAT testing of bot across web and social channels	hexaware
9	Bot integration into website and social media (guided by yaswanth)	hexaware
10	Dedicated point of contact during set-up	hexaware

Onboarding activities commence after receipt of the one-time set-up fee and will be completed within 4-8 weeks. Go-Live follows UAT and any required refinements within 5 days.

Implementation Plan

A detailed implementation plan with timelines will be presented during the kick-off call. It will outline configuration steps, integration milestones, testing phases, and the final Go-Live schedule.

Support

Yaswanth provides 24/7 technical support (2-4-7 model) along with a dedicated account manager who will be your single point of contact throughout the subscription term. Support covers issue triage, bot performance tuning, and periodic health checks.

Conclusion

Yaswanth is committed to delivering a robust AI Contact Centre and Chat Bot solution that empowers Hexaware to enhance customer engagement, streamline operations, and drive revenue growth. We look forward to partnering with you on this transformative journey.
